

SAFETY DATA SHEET

CARBOBOND LITE

Section 1. Identification			
GHS product identifier	: CARBOBOND LITE		
Product category(ies)	: Oil and gas.		
Other means of identification	: Resin-Coated Ceramic Proppant; Semi-Crystall	ine Alumina Silicate; Si	ntered Kaolinite.
Product type	: Solid.		
Relevant identified uses of the s Proppant for oil and natural gas	ubstance or mixture and uses advised against well hydraulic fracturing.		
Supplier's details	: CARBO Ceramics Inc. 575 N. Dairy Ashford Road, Suite 300 Houston, Texas 77079, USA 1-800-551-3247		
Emergency telephone number (with hours of operation)	: For Chemical Emergency Spill, Leak, Fire, Exposure, or Accident Call CHEMTREC Day or Night Within USA and Canada: 1-800-424-9300		
Section 2. Hazards identific	ation		
OSHA/HCS status	: While this material is not considered hazardou (29 CFR 1910.1200), this SDS contains valuable proper use of the product. This SDS should be users of this product.	e information critical to	the safe handling and
Classification of the substance or mixture	: Not classified.		
GHS label elements			
Signal word	: No signal word.		
Hazard statements	: No known significant effects or critical hazards	S.	
Precautionary statements			
Prevention	: Not applicable.		
Response	: Not applicable.		
Storage	: Not applicable.		
Disposal	: Not applicable.		
Hazards not otherwise	: None known.		
classified			
Section 3. Composition/infe	ormation on ingredients		
Substance/mixture	: Article.		
CAS number/other identifiers			· · ·
Ingredient name		%	CAS number
Ceramic materials and wares, ch	emicals	≥90	66402-68-4
			0000 25 4

Phenol formaldehyde resin.

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section. Occupational exposure limits, if available, are listed in Section 8.

≤5

9003-35-4

Section 4. First aid measures

Description of necessar	<u>y first aid measures</u>
Eye contact	: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
Skin contact	: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.
Ingestion	: Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed

Potential acute health e	effects
Eye contact	: No known significant effects or critical hazards.
Inhalation	: No known significant effects or critical hazards.
Skin contact	: No known significant effects or critical hazards.
Ingestion	: No known significant effects or critical hazards.
Over-exposure signs/sy	<u>mptoms</u>
Eye contact	: No specific data.
Inhalation	: No specific data.
Skin contact	: No specific data.
Ingestion	: No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician	: Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments	: No specific treatment.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

Section 5. Fire-fighting mea	sures
Extinguishing media	
Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire. Use dry chemical, CO ₂ , water spray (fog) or foam.
Unsuitable extinguishing media	: None known.
Specific hazards arising from the chemical	: Product may ignite if exposed to open flame or other ignition sources.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide metal oxide/oxides
Special protective actions for fire-fighters Special protective equipment for fire-fighters	 Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures Personal precautions, protective equipment and emergency procedures For non-emergency personnel : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment. : If specialized clothing is required to deal with the spillage, take note of any information in For emergency responders Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel". **Environmental precautions** : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Methods and materials for containment and cleaning up Small spill : Move containers from spill area. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor. : Move containers from spill area. Prevent entry into sewers, water courses, basements or Large spill confined areas. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. Section 7. Handling and storage Precautions for safe handling **Protective measures** : Put on appropriate personal protective equipment (see Section 8). Advice on general : Eating, drinking and smoking should be prohibited in areas where this material is handled, occupational hygiene stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. Conditions for safe storage, : Store in accordance with local regulations. Store in original container protected from direct including any incompatibilities sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

Control parameters

Ingredient name		Exposure limits
Ceramic materials and wares, c	hemicals	None.
Phenol formaldehyde resin.		None.
controlscontaminants.Environmental exposure: Emissions from ventilation or work process comply with the requirements of environm		sufficient to control worker exposure to airborne
		process equipment should be checked to ensure they nvironmental protection legislation. In some cases, fume odifications to the process equipment will be necessary to els.
Individual protection measures		
Hygiene measures	smoking and using the lavatory and should be used to remove potentia	broughly after handling chemical products, before eating, d at the end of the working period. Appropriate techniqu Ily contaminated clothing. Wash contaminated clothing sh stations and safety showers are close to the workstation

CARBOBOND LITE	
Section 8. Exposure cont	rols/personal protection
Eye/face protection	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.
Skin protection	
Hand protection	: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
Body protection	 Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection	: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Section 9. Physical and chemical properties

Appearance		
Physical state	Solid. [Solid spheres.]	
Color	Pale green to pale yellow.	
Odor	Odorless.	
Odor threshold	Not applicable.	
рН	Not applicable.	
Melting point	Not available.	
Boiling point	Not available.	
Flash point	Not available.	
Evaporation rate	Not available.	
Flammability (solid, gas)	Not available.	
Lower and upper explosive	Not available.	
(flammable) limits		
Vapor pressure	Not available.	
Vapor density	Not available.	
Relative density	2.6	
Solubility	Not available.	
Solubility in water	Not applicable.	
Partition coefficient: n-octanol/	<2.3	
water		
Auto-ignition temperature	Not available.	
Decomposition temperature	Not available.	
Viscosity	Not available.	
Flow time (ISO 2431)	Not available.	
Section 10. Stability and rea	vity	
Reactivity	Not considered to be reactive.	
Chemical stability	The product is stable.	
Possibility of hazardous	Under normal conditions of storage and use, hazardous reactions will not occur.	
reactions		
Conditions to avoid	Avoid exposure to flame or other ignition sources.	
Incompatible materials	Strong oxidizer	
Hazardous decomposition	Thermal decomposition may produce oxides of carbon, oxides of nitrogen, ammonia, alc	dehydes,
products	phenol or other materials.

Caution: HMIS[®] ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS[®] ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS[®] ratings are to be used with a fully implemented HMIS[®] program. HMIS[®] is a registered trademark and service mark of the American Coatings Association, Inc. The customer is responsible for determining the PPE code for this material. For more information on HMIS[®] Personal Protective Equipment (PPE) codes, consult the HMIS[®] Implementation Manual.
